

# LEGACY STOVES™

Advanced Design  
Old Fashioned Value

We have been in the alternative heating business for 38 years. Nothing in hand-fired wood & coal furnaces, as well as boilers, comes close to the quality of workmanship & functional operation of the Legacy Stove line.

# LEGACY STOVES WOOD COAL FURNACES

## Advanced Design

The SF1500, SF2500, and SF3500 are powerful hot air furnaces with broad heat output range. These hot-air furnaces are built to provide consistent temperatures throughout your entire home, and feature automatic blowers and advanced filtering systems.

Maintenance on the SF1500, SF2500, and SF3500 is simple. An external cleaning rod reaches into critical pipes and baffles for quick cleaning. A large ash tub provides less frequent ash removal. Intuitive user controls are easily accessible and offer automatic temperature management.

## Old Fashioned Value

Compare our product weight versus the competition at the same BTU output. We use heavier plate throughout our product lines. Rugged, over-engineered stoves, furnaces and boilers are a longstanding tradition for Legacy Stoves.

Fuel flexibility is also outstanding, with the option to use pea, nut or stove sized coal, or firewood.

### Features

- Legacy Stoves grate system
- Spiral chamber
- 1,450 CFM blower (priced separately)
- Large Ash Tub

### Options

- Firebox Reducer
- Domestic Coil
- Forced Draft

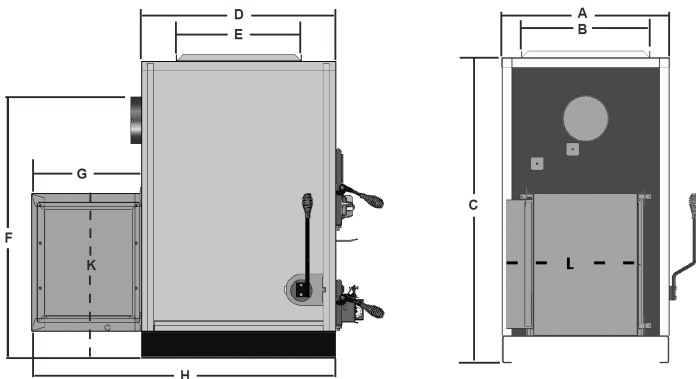

Installations are made simple with their durable & reliable components. Efficiency and ease of operations makes Legacy the industry leader.

--Joe Panaro, J&O Heating

## Furnaces<sup>3</sup>

Model	SF1500	SF2500	SF3500
