

LEGACY STOVES™

Advanced Design
Old Fashioned Value

We have been in the alternative heating business for 38 years. Nothing in hand-fired wood & coal furnaces, as well as boilers, comes close to the quality of workmanship & functional operation of the Legacy Stove line.

SF250

SF250 Tribute
COAL STOVE

Advanced Design

With the Spiral Chamber heat exchanger, the SF250 is more efficient than competitors' high output coal stoves.

Old Fashioned Value

The SF250 is a powerful stove with a broad heat output range that includes the highest output of any Legacy Stoves coal stove. A large ash tub provides less frequent ash removal. An included blower reduces heat loss to the outside by up to 25%.

Features

- Legacy Stoves grate system
- Spiral chamber
- Highest output of any Legacy Stoves coal stove
- 135 cfm blower

Options

- Domestic hot water coil
- Off grid water heater
- Off grid oven
- Off grid cook top

Rear-Mounted Blower

Side-Mounted Water Heating Tank

Stainless Steel Cooktop

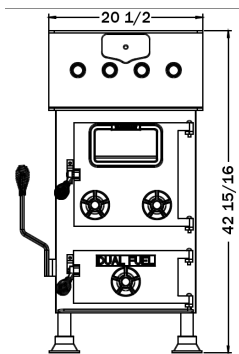

Off grid and reduced power heating options are becoming ever more popular. Legacy Stoves has responded with off grid options for the rugged and reliable SF250. These include a stainless steel cook top (left), an oven (right) and stainless steel water heating tank (above). The rear-mounted fan improves stove heating capacity and efficiency, and has low current requirements. The SF250 can be operated without this fan, and without electrical power, if desired.

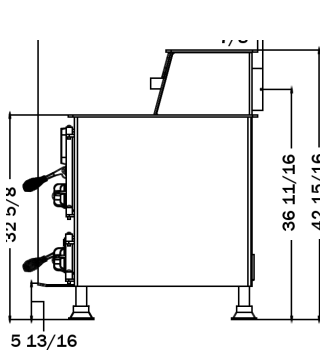

SF250 With Off Grid Accessories

| SF250 COAL STOVE | BTU/hr Input | Heating Capacity ¹ | Fuel Type | Flue Collar | Firebox Size | Weight |
|------------------|--------------|-------------------------------|------------------------|-------------|--------------|----------|
| | 120,000 | 3000 sq. ft. | Pea, Nut or Stove Coal | 6" | 4.5 cu. ft. | 650 lbs. |
