COAL FURNACES

LEGACY STOVES COAL FURNACES

ADVANCED DESIGN

The SF1500, SF2500, and SF3500 are powerful hot air furnaces with broad heat output range. These hot-air furnaces are built to provide consistent temperatures throughout your entire home, and feature automatic blowers and advanced filtering systems.

Maintenance on the SF1500, SF2500, and SF3500 is simple. An external cleaning rod reaches into critical pipes and baffles for quick cleaning. A large ash tub provides less frequent ash removal. Intuitive user controls are easily accessible and offer automatic temperature management.

OLD FASHIONED VALUE

Compare our product weight versus the competition at the same BTU output. We use heavier plate throughout our product lines. Rugged, over-engineered stoves, furnaces and boilers are a longstanding tradition for Legacy Stoves.

Fuel flexibility is also outstanding, with the option to use pea, nut or stove sized coal.

Features

- Legacy Stoves grate system
- Spiral chamber
- 1,450 CFM
- Large Ash Tub

Options

- Firebox Reducer
- Domestic Coil

Furnaces³
