Advanced Design  
Old Fashioned Value

MODEL  
SF270

SF170/SF270  
COAL BOILER

## POWERFUL AND EFFICIENT

The SF170 and SF270 boilers are compact, flexible and powerful hot water boilers with a broad heat output range. A domestic hot water coil lets you supplement home heating with hot water, too.

## ADVANCED DESIGN

Maintenance on the SF170/270 is simple. Horizontal water tubes add strength and additional thermal efficiency. A large ash tub provides less frequent ash removal. Intuitive user controls are easily accessible and offer automatic temperature management.

## OLD FASHIONED VALUE

Compare our product weight versus the competition at the same BTU output. We use heavier plate throughout our product lines. Rugged, over-engineered stoves, furnaces and boilers are a longstanding tradition for Legacy Stoves.

Fuel flexibility is also outstanding, with the option to use pea, nut or stove sized anthracite coal. Lump bituminous and graded bituminous coals may also be used.

### Boilers<sup>3</sup>

| Model                           | SF170                       | SF270                       |
|---------------------------------|-----------------------------|-----------------------------|
| BTU/Hour Input                  | 90,000                      | 120,000                     |
| Heating Capacity                | 1,000-3,200                 | 1,900-4,200                 |
| Fuel                            | Pea, Nut, Stove & Lump Coal | Pea, Nut, Stove & Lump Coal |
| A. Height to top of lifting lug | 46.75                       | 52.25                       |
| B. Width                        | 26.2                        | 28                          |
| C. Height to top of flue collar | 36.6                        | 42.5                        |
| D. Depth                        | 27.4                        | 33.3                        |
| E. Height to top of boiler      | 42.9                        | 48.6                        |
| Weight (lbs)                    | 1050                        | 1250                        |
| Flue Collar Size                | 8                           | 8                           |
| Number of Grates                | 4                           | 5                           |
| Firebox Size                    | 22 x 15.5 x 19              | 27.5 x 20.5 x 21            |
| Firebox Size (Cubic Feet)       | 3.6                         | 6.5                         |
| Clearance (Sides)               | 24                          | 24                          |
| Clearance (Rear)                | 36                          | 36                          |
| Clearance (Top)                 | 24                          | 24                          |
| Clearance (Front)               | 48                          | 48                          |
| Certifications                  | UL/ASME                     | UL/ASME                     |

### Features

- Legacy Stoves grate system
- Spiral chamber
- New! High quality powder coat finish!
- Water-cooled baffle
- Automatic water temperature control
- Pressurized vessel for extra long life
- ASME approved vessel design

### Options

- Domestic hot water coil
- NON-Electric conversion kit
- Forced Draft Fan (SF270 only)

<sup>3</sup>Specifications subject to change without notice. All dimensions in inches, unless otherwise noted.

All Legacy Stoves boilers carry the ASME H Stamp, for maximum safety and ease of compliance with code and insurance requirements.
